

PRESSURE DEVICE AS DISPENSER FOR CONTAINERS OF SERIES LT

Suitable for SCHMIDT-drums type LTA and LTB

Clamping assembly enables easy fixing and adjusting of the device on the drum

Turning the pressure nut by hand guarantees a gastight closure

Optional connection:
flexible hose (KS) to compressed air or nitrogen supply
or
hand pump ball (KB),
both easily to joint by quick-couplers

2 valves enable a complete gastight closure of the container, avoiding evaporation, pollution and leaking

Material stainless steel grade 304

Gaskets (O-rings) of Viton or Perfluorelastomere

Dip-pipes exchangeable,
length according to the type of container

Article designation:

		Type of dispenser
Dispenser with dip-pipe for container type:	LTA 10, LTB 10	ET 10 V (P)*
	LTA 20, LTB 20	ET 20 V (P)*
